WORK EXPERIENCE

SBFM, Cleaner, London

02/2025 – 08/2026

- Maintained client sites to a high standard of cleanliness in compliance with standard operation processes.

House of Bandits, System Administrator, Vienna

08/2020 – 12/2021

- Achieved ~97% network uptime.
- Launched a new media file server service generating €12,000 in revenue in the first 3 months post-launch.
- Launched a central cloud hub to consolidate project assets and allow for seamless resource sharing with clients. Enabled secure remote access, saving time and increasing reliability.
- Upgraded company LAN to 10 gigabit speeds:
 - Enabled rapid sharing of project files between employees.
 - Eliminated an attack surface by ending the use of physical hard drives for data-transfer.
 - Reduced project turnaround times by several days.
- Installed environmental monitoring for client IT infrastructure. Enabled accurate remote diagnostic and reduced physical call-outs by over 50%

Caravan, Waiter, London

03/2019 – 03/2020

- High standard of service at one of London's busiest shopping and travel centres. Trained in rigorous allergen and food safety processes and achieved restaurant turnover targets.

Success Resources, Customer Service Executive, London

01/2018 – 03/2019

- Optimised the department communication and complaints workflow. Sped up the department response time from 3–5 business days to a maximum of 48 hours.
 - Email templates to eliminate manual responses
 - A new complaints escalation SOP reduced approval requests made to managers and eliminated bottlenecks in the department procedure.
- Reduced 1- and 2-star reviews due to inconsistent decisions by nearly 50% over a 6-month period.

EDUCATION

BIMM, Diploma Level 3, Popular Music Performance

09/2015 – 07/2016

Merit

Brighton College – GCSEs: Maths, Physics & English

09/2022 – 07/2023

Grade A, A, A

Makers Academy, Skills Bootcamp, Software Engineering

01/2020 – 04/2020

Principles of OOP, TDD and pair programming. Practical approach using Ruby, Javascript with Node, SQL. Graduated with a final project 'space-trash' tracking orbital debris using NOAA data.
