To whom it may concern,

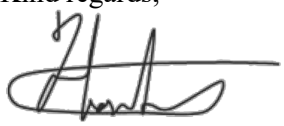

I am pleased to recommend Anton, who has provided consulting support in the areas of IT infrastructure. Having known Anton for some time, I have always found him to be thorough, perceptive and highly detail oriented.

He has a natural ability to hold the needs of multiple individuals together, understand what is going on in a situation, and offer complete practical solutions that might otherwise be difficult to unravel. He also approaches problems in a methodical and action-based way.

Anton combines strong technical capability with very good people skills. They are comfortable engaging with technical detail but are equally good at communicating with and explaining things to people without a technical background.

They are adaptable, dependable and able to deal with a wide range of situations, which has made them someone I have valued working with and would be very happy to recommend.

Kind regards,

Tonjaka Hinkson
